National FOP Endorses PureForge Braking Systems: *New technology will improve officer safety*

WASHINGTON, D.C. – Patrick Yoes, National President of the Fraternal Order of Police, said the organization is dedicated to advancing the safety, performance, and operational efficiency of our nation’s law enforcement agencies through technology.

“As the largest and most respected law enforcement organization in the United States, I am pleased to share the support of the National Fraternal Order of Police for a promising advancement in vehicle safety technology, the braking system solutions developed by PureForge,” Yoes said. “After careful consideration and evaluation by our National FOP Safety and Technology Committee, we recognize the significant potential of this innovation to positively impact law enforcement fleets across the country.”

PureForge has developed specialized brake components and metallurgical surface treatments that offer groundbreaking improvements in performance and durability. These advanced braking systems, compatible with patrol vehicles and motorcycles alike, demonstrate:

- Exceptional heat dissipation capabilities;
- Greatly reduced brake fade, ensuring consistent stopping power even under extreme conditions; and
- Significant reduction in wear on both rotors and pads, resulting in longer service life.

“These enhancements are more than technical milestones, they are mission-critical improvements,” Yoes explained. “The increased braking reliability enhances officer safety, protects vehicle occupants, and contributes to the overall safety of the public. In high-risk and high-speed environments, superior braking performance can be the difference between safety and tragedy.”

Law enforcement agencies that adopt these advanced systems are likely to experience measurable cost savings over the lifespan of the vehicle, due to reduced component replacement, minimized downtime, and decreased maintenance needs—all of which reduce costs to the taxpayer.

“As we face growing demands and operational pressures, it is innovations like these that help us better equip the men and women who protect our communities,” Yoes said, “The Fraternal Order of Police commends the work of PureForge and supports the continued exploration and implementation of emerging technologies that enhance safety, extend operational effectiveness, and improve long-term sustainability for public safety agencies.”

###

Founded in 1915, the Fraternal Order of Police is the largest law enforcement labor organization in the United States, with more than 377,000 members. With national offices in Nashville, Tennessee, and Washington, D.C., the FOP is committed to improving the working conditions of law enforcement officers and the safety of those served through education, legislation, information, community involvement, and employee representation.
